

SIZE Chart

WOMEN - HEIGHT +/-168cm – INNER LEG LENGTH 72.5cm

THE PATTERNS ARE MADE USING STANDARD TEXTILE INDUSTRY SIZING. YOU SHOULD FIND THAT YOU MEASURE UP TO YOUR USUAL SIZE.

For best results, follow the fabric choice recommendations. Patterns are designed differently for different fabric types (thick, drapey, knits, etc.). If you wish to make this pattern using a different kind of fabric to that recommended, make up a muslin using fabric similar to the one you want to use; the pattern will almost certainly require adjustments for a perfect fit.

Don't panic if your measurements fall into several size categories, just choose the size that best matches them. Work up a quick muslin if you want to double check your size.

More experienced sewers can blend sizes by realigning curvatures on the pattern sheet (the fewer the pattern pieces the easier this will be).
